

Reach Pole

Telescopic Rescue System

The Reach Pole Telescopic Rescue System achieves fast delivery of floatation/rescue and other devices at a distance, over water, ice or mud, height or depth, or anywhere where a long reach is required

Designed in conjunction with a leading UK Fire & Rescue division, the system is ideal for the Emergency Services, Military, Rescue Organisations and others involved in water, ice and mud rescues

At the core of the system is a lightweight glass fibre or carbon fibre telescopic pole, to which may be attached a range of rescue appliances or tools. The outer end of the pole can be supported over water using a floatation ball

Outstanding quality

Fast deployment

Failsafe internal rope prevents loss

Lifetime guarantee

Pole Length		Dia. Held Section	Material	Wt. (kg)
Extended	Stowed			
5m	1.8m	35mm	Glass Fibre	2.1
9m	2.1m	45mm	Carbon Fibre	3.1
13m	2.4m	50mm	Carbon Fibre	4.7
17m	2.6m	50mm	Carbon Fibre	5.2

- Fast, accurate, simple and effective
- Lightweight
- On water, floatation ball takes the weight of the pole, so permitting precise location
- Requires minimal operator training
- In use in over 25 countries
- Quickly and accurately positioned
- Depending on conditions, can be deployed by a single operator
- Even the 17m pole would normally require not more than two operators
- Very low maintenance

Versatile

Water - Mud - Ice -
Height - Depth

Floatation Rescue Collar

Versatile

Marine - Offshore -
Emergency Services -
Military - Ports -
Waterways

Camera - search and see at height and underwater

Versatile
